**Cornerstone Specialty Wood Products, LLC
Will Deliver Seminar at ProMat® 2009 Event in Chicago**

Cincinnati, OH, September 4, 2008 — Greg Doppler, President of Cornerstone Specialty Wood Products, LLC will be presenting the seminar titled: Choosing the Correct Flooring System for Industrial Work Platforms and Pick Modules, January 13, 2009, at 4:00 pm in Theater H at McCormick Place during the ProMat® 2009 Show.

Mr. Doppler has been developing mezzanine flooring for distribution centers, work platforms, pick module areas, logistic centers, and warehouses for over 20 years. Such brand names as ResinDek®, Xspan®, Diamond Seal®, and Invisi-Loc® have provided innovative designs and options to the 3PL and material handling industry.

The material handling industry has had substantial growth from imports and the Internet. However, one of the most critical elements of a successful warehouse distribution center is choosing the proper flooring system. Careful attention needs to be paid to structural supports, corrugated metal roof deck type and of course the flooring itself because of the frequent movement of product across the flooring.

In this seminar, different flooring systems will be discussed that are currently available with the strengths and weaknesses of each type. You will learn what to look for in a flooring system that will prove to be the most economical, practical, and the one that provides the greatest satisfaction in the long run for your organization's unique needs. Tips will be provided on how to effectively select a flooring system supplier.

More information regarding this seminar and show can be found at www.ProMatShow.com and www.resindek.com.
