**Cornerstone Specialty Wood Products, LLC  
Finds Momentum with “E” Theme**

**Cincinnati, OH – June 1, 2011** –Cornerstone Specialty Wood Products, LLC, the leading designer and manufacturer of ResinDek® elevated platform flooring products welcomes a new Employee and brings more than a floor to distribution centers.

ResinDek® panels are proving to be more than Enduring, since these panels are more Ergonomic, Economic, and Environmental than their counter parts bar grate and concrete.

In ergonomics ResinDek® panels are more comfortable to walk and work on resulting in fewer lost time injuries from back strain. The economical impact of using ResinDek® versus Concrete adds up to \$3.00-\$5.00 per square foot and is less expensive in freight when shipping. Environmentally ResinDek® produces less smog and hydrogen than concrete and actually is a net energy producer at the end of its life cycle.

Leadership in these and other areas has led to significant growth in Cornerstone Specialty Wood Products’ business. To accommodate this growth, and to better support installations across North America, Cornerstone Specialty Wood Products has brought on additional help, and welcomes Bob Lancaster as Field Service Engineer. Bob is an Industrial Arts graduate of Eastern Kentucky University and has more than 35 years of designing and implementing conveyor systems, storage systems, pick modules and mezzanines in distribution centers throughout the USA.
