What Inquiring DCs want to know!

ResinDek® Xspan® Saves Money for Retailer

Cornerstone Specialty Wood Products recently teamed up with Daigle Engineers, Inc. and Pinnacle Construction to refurbish a damaged concrete mezzanine structure.

Daigle Engineers, Inc. contacted Cornerstone Specialty Wood Products with an idea. They felt that by placing steel sleepers on the damaged concrete and directly over the steel bar joists below, the loads could be transferred through the pre-existing cracked concrete, and onto the underlying substructure. By installing the steel sleepers and ResinDek Xspan over the existing slab, it would avoid flexural loading of the damaged slab and deck, saving over \$1 million dollars by avoiding the tear-down and replacement of a 75,000 square foot structure.

Check out the details and images for this newsworthy success story at ResinDek.com under Brochures/Literature page pdf titled Retailer Success Story

Cornerstone Specialty Wood Products Personnel Out & About

The **North American 2010 Material Handling & Logistics Show** this past April was a busy time for Cornerstone Specialty Wood Products personnel. They introduced the new collated screw gun and participated in a NA Show Floor Seminar for the Storage Manufacturers Association.

Cornerstone Specialty Wood Products personnel also escorted college students to pre-set meetings at numerous NA Show booths to introduce the students to various products and services within the Material Handling Industry.

The MHEDA (Material Handling Equipment Distributors Association) Conference was equally successful and gave Cornerstone Specialty Wood Products the opportunity to talk with several Dealers, Integrators, and key Manufacturers.

On The Green

Cornerstone Specialty Wood Products continues to keep moving forward with new products and new LEED® Certification Information.

As introduced in our April e-newsletter our ResinDek® NAF Product has received SCS Certification for No Added Formaldehyde and Minimum 46% Pre-consumer Recycled Content.

Other ResinDek products meet the LEED 2009 Certification for 46% Pre-consumer Recycled Content and can contribute towards numerous LEED 2009 Credits.

Please see details at ResinDek.com Environmental Information page
