MAX

*To us it's not just another mezzanine floor!
It's another working tool to make your job easier.*

- ResinDek[®] MAX supports up to **8,000 lbs.** live and dead loads
- You can use **electric pallet jacks** on New ResinDek MAX mezzanine decks
- ResinDek[®] MAX is **ergonomically friendlier** than other flooring materials, making it easier to work on
- With Diamond Seal 2[™] finishes ResinDek MAX is **easy to clean** and looks great for years

With our combined industry knowledge and obsession to make the best mezzanine flooring systems for manufacturing and material handling, we test and engineer flooring panels for your specific performance needs.

Call Cornerstone Specialty Wood Products Engineering Department today and we will provide you with detailed test reports for you and your customer upon request.
