Section 01 - Identification

Common / Product Name: ResinDek® LD, SD, MD, HD, Xspan® UF
ResinDek® LD, SD, MD, HD, Xspan® Gray Diamond Seal® 2, ESD, & TriGard®

Revision Date: July 24, 2020
Recommended Use: Flooring Products
Shelving

Identification of the Company:

Universal Woods Inc.
2600 Grassland Drive
Louisville, KY 40299-2591
USA

Emergency Telephone No: (502) 491 1477
Other Information Calls: (502) 491 1461

Emergency Information:

CHEMTREC 24 HR. Emergency Telephone:
U.S. /North America: (800) 424-9300
International: (703) 527-3887

Section 02 - Hazard(s) Identification

Emergency Overview
This product is not hazardous in the form in which it is shipped by the manufacturer but may become hazardous by downstream activities (e.g., grinding, sanding, cutting, pulverizing) that reduce its particle size. Those hazards are described below.

Physical Hazards
Not Classified

Health Hazards
Eye Irritation Category 2B
Sensitization, Respiratory Category 1
Sensitization, Skin Category 1A
Carcinogenicity Category 1A
Specific Target Organ Toxicity, Single Category 3 Respiratory Tract Irritation Exposure
Specific Target Organ Toxicity, Repeated Category 1 (Respiratory System) Exposure

Environmental Hazards
Not classified

OSHA Defined Hazards
Combustible Dust

Label Elements

Signal Word
Danger

Hazard Statement
May cause an allergic skin reaction. Causes eye irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause respiratory irritation. May cause cancer. Causes damage to organs (respiratory system) through prolonged or repeated exposure. If small particles of wood dust are generated during further processing, handling or by other means, may form combustible dust concentrations in air.
Precautionary Statement

Prevention
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/protective clothing/eye protection/face protection. Wear respiratory protection. Avoid breathing dust/fume/gas/mist/vapors/spray. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Use only outdoors or in a well-ventilated area. Prevent dust accumulation and airborne dispersion of dust to minimize flash fire and explosion hazard. Keep away from heat/sparks/open flames/hot surfaces. No smoking.

Response
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse. If inhaled: Remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms: Call a poison center/doctor or other qualified medical professional. If exposed or concerned: Get medical advice/attention. In case of fire: Use appropriate media to extinguish.

Storage
Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).

Disposal
Dispose of contents/container in accordance to local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)
None Known

Supplemental Information
None

| Section 03 - Composition/Information on Ingredients |
|---------------------------------------------------|-----------------------|-----------------|
| Chemical Name                                    | CAS #                 | Weight %        |
| Wood/Wood Dust                                    | Not Assigned          | 80 - 100        |
| Methylene Bisphenol Isocyanate (MDI)              | 101-68-8              | 1 - 5           |
| Polymeric MDI (pMDI)                              | 9016-87-9             | 1 - 5           |
| 2,4'-Diphenyl Methane Disocyanate                 | 5873-54-1             | 0.1 - 1         |
| Other components below reportable levels          |                       | 0.5 - 1.5       |

The specific chemical identity and/or percentage of composition has been withheld as a trade secret.

Section 04 - First-Aid Measures

Inhalation
Remove from area of exposure. If the affected person is not breathing, apply artificial respiration. If persistent irritation, severe coughing or breathing difficulty occurs, seek medical attention.

Skin Contact
If irritation develops, wash with soap and water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Eye Contact
Do not rub eyes. Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.

Ingestion
If wood or wood dust is swallowed, get immediate medical attention or advice -- Do not induce vomiting.

Most Important Symptoms/Effects, Acute and Delayed
Irritation of eyes. Exposed individuals may experience eye tearing, redness, and discomfort. May cause an allergic skin reaction. Dermatitis. Rash. May cause respiratory irritation. Difficulty in breathing.
Section 05 - Fire-Fighting Measures

Indication of Immediate Medical Attention and Special Treatment Needed
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General Information
If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

Section 06 - Accidental Release Measures

Personal Precautions, Protective Equipment, and Emergency Procedures
Use only non-sparking tools. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation.

Methods and Materials for Containment and Cleaning Up
Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Take precautionary measures against static discharge. Use only non-sparking tools. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Vacuum dust with dust ignition proof vacuum or wet sweep small wood pieces and dust; place in appropriate container for disposal. Gather larger pieces by an appropriate method. Reduce airborne dust by use of wet methods (e.g. water mist) and prevent scattering by moistening with water. For waste disposal, see section 13 of the SDS.

Environmental Precautions
Avoid discharge into drains, water courses or onto the ground.
Precautions for Safe Handling

Dust can form an explosive mixture in air. Provide appropriate exhaust ventilation at machinery and at places where dust can be generated. Minimize dust generation and accumulation. Avoid significant deposits of material, especially on horizontal surfaces, which may become airborne and form combustible dust clouds and may contribute to secondary explosions. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. If flash fire or explosion hazard is present, wear flame resistant clothing and face/head protection. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Use personal protective equipment as required. Ensure dust collection systems used for conveying combustible wood dusts are protected with and equipped with fire and explosion prevention and protection equipment. See NFPA 664 and NFPA 69 for further requirements, information and guidance.

Conditions for Safe Storage, Including any Incompatibilities

Store flat, supported and protected from direct contact with the ground. Store away from incompatible materials (see Section 10 of the SDS). Store in a cool dry place.

Exposure Guidelines

Georgia-Pacific Wood Products LLC voluntarily elects to adhere to exposure limits contained in OSHA's 1989 Air Contaminants Standard although certain limits were vacated in 1992. The present OSHA exposure limits governing wood dust is 15 mg/m³ (Total Dust) and 5 mg/m³ (Respirable Fraction).

Section 07 - Handling and Storage

### Precautions for Safe Handling

Dust can form an explosive mixture in air. Provide appropriate exhaust ventilation at machinery and at places where dust can be generated. Minimize dust generation and accumulation. Avoid significant deposits of material, especially on horizontal surfaces, which may become airborne and form combustible dust clouds and may contribute to secondary explosions. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. If flash fire or explosion hazard is present, wear flame resistant clothing and face/head protection. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Use personal protective equipment as required. Ensure dust collection systems used for conveying combustible wood dusts are protected with and equipped with fire and explosion prevention and protection equipment. See NFPA 664 and NFPA 69 for further requirements, information and guidance.

### Conditions for Safe Storage, Including any Incompatibilities

Store flat, supported and protected from direct contact with the ground. Store away from incompatible materials (see Section 10 of the SDS). Store in a cool dry place.

### Exposure Guidelines

Georgia-Pacific Wood Products LLC voluntarily elects to adhere to exposure limits contained in OSHA's 1989 Air Contaminants Standard although certain limits were vacated in 1992. The present OSHA exposure limits governing wood dust is 15 mg/m³ (Total Dust) and 5 mg/m³ (Respirable Fraction).
Appropriate Engineering Controls

Due to the fire and explosive potential of dust when suspended in air, precautions should be taken when material is used in any operation which may generate dust. Local exhaust, general dilution ventilation in enclosed areas, and explosion proof equipment is recommended. Use wet methods, if appropriate, to reduce airborne dust concentrations.

Individual Protection Measures, Such as Personal Protective Equipment

Eye/Face Protection

Safety glasses or goggles are recommended when using this product. Ensure compliance with OSHA’s PPE standard (29 CFR 1910.132 and .133) for eye and face protection.

Skin Protection

Hand Protection

Wear appropriate chemical resistant gloves. Suitable gloves can be recommended by the glove supplier.

Other

Impervious protective clothing and gloves recommended to prevent drying or irritation of skin. Ensure compliance with OSHA’s PPE standards (29 CFR 1910.132 (general) and 138 (hand protection)). Safety shower/eye wash fountain is recommended in the workplace area (29 CFR 1910.151 (c)).

Respiratory Protection

A NIOSH approved dust mask or filtering facepiece is recommended in poorly ventilated areas or when permissible exposure limits may be exceeded. Respirators should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA’s respirator standard (29 CFR 1910.134) and ANSI’s standard for respiratory protection (Z88.2).

Thermal Hazards

Wear appropriate thermal protective clothing (i.e. flame resistant clothing and head/face protection), when potential flash fire or explosion hazards are present.

General Hygiene Considerations

When using, do not eat, drink or smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

| Appearance | Rigid boards or panels |
| Physical State | Solid |
| Form | Solid Wood |

| Explosive Limit - Lower (%) | Not Available |
| Explosive Limit - Upper (%) | Not Available |
Section 10 - Stability and Reactivity

Reactivity
The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical Stability
Material is stable under normal conditions.

Possibility of Hazardous Reactions
No dangerous reaction known under conditions of normal use.

Conditions to Avoid
Dust accumulation, dispersion of dust in air, high temperatures, open flame, sparks, or other sources of ignition.

Incompatible Materials
Strong acids, alkalies, oxidizing agents and drying oils.

Section 11 - Toxicological Information

Information on Likely Routes of Exposure

Inhalation
Inhalation of dusts may cause respiratory irritation. May cause allergy or asthma symptoms or breathing difficulties if dust inhaled. Prolonged inhalation may be harmful.

Skin Contact
May cause an allergic skin reaction.

Eye Contact
Causes eye irritation.

Ingestion
Not applicable under normal conditions of use. May result in obstruction or temporary irritation of the digestive tract.

Symptoms Related to the Physical, Chemical, and Toxicological Characteristics
Irritation of eyes. Exposed individuals may experience eye tearing, redness, and discomfort.

Hazardous Waste Code
The waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Germ Cell Mutagenicity
No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

Carcinogenicity
Wood dust generated from sawing, sanding or machining this product may cause nasal dryness, irritation, coughing and sinusitis. The International Agency for Research on Cancer (IARC), and National Toxicology Program (NTP) classifies wood dust as a carcinogen. This classification is based on the increased occurrence of adenocarcinomas of the nasal cavities and paranasal sinuses associated with exposure to wood dust. The evaluation noted insufficient evidence to associate cancers of the oropharynx, hypopharynx, lung, lymphatic and hematopoietic systems, stomach, colon, or rectum with exposure to wood dust.

IARC Monographs. Overall Evaluation of Carcinogenicity
Methylene Bisphenol Isocyanate (MDI) (CAS 101-68-8) 3 Not classifiable as to carcinogenicity to humans.
Polymeric MDI (pMDI) (CAS 9016-87-9) 3 Not classifiable as to carcinogenicity to humans.
Wood/Wood Dust (CAS Not Assigned) 1 Carcinogenic to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)
Not Regulated

US. National Toxicology Program (NTP) Report on Carcinogens
Wood/Wood Dust (CAS Not Assigned) Known to be human carcinogen.

Reproductive Toxicity
This product is not expected to cause reproductive or developmental effects.

Specific Target Organ Toxicity - Single Exposure
May cause respiratory irritation.

Specific Target Organ Toxicity - Repeated Exposure
Causes damage to organs (respiratory system) through prolonged or repeated exposure.

Aspiration Hazard
Not an aspiration hazard.

Chronic Effects
Causes damage to organs through prolonged or repeated exposure. Prolonged inhalation may be harmful. Prolonged exposure may cause chronic effects.

Section 12 - Ecological Information

Ecotoxicity
The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and Degradability
No data is available on the degradability of this product.

Bioaccumulative Potential
No Data Available

Mobility in Soil
No Data Available

Other Adverse Effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

Section 13 - Disposal Considerations

Disposal Instruction
Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste.

Local Disposal Regulations
Dispose in accordance with all applicable regulations.

Hazardous Waste Code
The waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Waste from Residues/Unused Products
Dispose of in accordance with local regulations.

Contaminated Packaging
Empty packing/container can be disposed in accordance with all applicable regulations.
Transport in Bulk According to Annex II of MARPOL 73/78 and IBC Code
Not Applicable

US Federal Regulations
Wood and wood products are considered manufactured articles and are exempt under OSHA’s Hazard Communication Standard 29 CFR 1910.1200. Wood dust, a by-product generated from sawing, sanding or machining wood and wood products, is considered hazardous and is regulated under the Hazard Communication Standard 29 CFR 1910.1200.
