## Product and Services Portfolio

Cornerstone Specialty Wood Products, LLC was formed with over 20 years of experience in the Material Handling Industry.

The initial intent of Cornerstone Specialty Wood Products then and now is, “We don’t just make better mezzanine floors... We make mezzanine floors better.”

With this objective in mind the team at Cornerstone Specialty Wood Products has committed themselves to:

- Better products
- Easier installations
- Problem-solving finishes
- Application-specific flooring for all industries
- Excellent field support and product testing
- Environmental concerns (eligible LEED® credits for LEED® certified buildings)
- Material and labor savings for customers

To stay informed of new products, industry news, and jobsite happenings please visit our website at <http://www.resindek.com>.

ResinDek® Mezzanine Flooring Panels have been engineered and developed to be the superior choice for distribution centers and material handling experts.

Here are some of the reasons you will find over 8 million square meters across 18 countries of ResinDek in distribution centers around the world:

- Coating durability
- Proven structural integrity
- Available with Certified Static Control (ESD)
- Onsite installation support worldwide
- Panel joints are designed to handle rated loads when installed as recommended
- Showcase appearance
- Money saving option to concrete floors

You don’t have to just take our word for it. Browse the web site to learn about the proven product advantages and success that ResinDek® mezzanine floors deliver to DC’s just like yours!

Cornerstone Specialty Wood Products warrants all of its ResinDek panels to be free from defect, structurally sound and able to safely carry the design loads as specified for a period of 10-Years.

## ResinDek® Xspan®

ResinDek® Xspan® is a 28 mm thick panel that offers the look, maintainability and performance of ResinDek® in a structural flooring solution where a metal corrugated substructure is not required. ResinDek® Xspan® is tested and capable of supporting 600 kg/m<sup>2</sup> uniform loads at 800 mm center supports and 1,050 kgs. pallet jack loads (refer to product page for load span tables). ResinDek® Xspan® flooring panels have been approved by IBC Code Officials for use as a structural flooring system in certain applications. Structural supports must be reviewed and approved by Cornerstone Specialty Wood Products, LLC (CSWP), and must be capable of supporting floor loads at specific intervals. For further details, call CSWP and/or your local building code official.

## ResinDek® Fire Resistant Xspan®

Like ResinDek® Xspan®, ResinDek® Fire Resistant (FR) Xspan® is a structural solution that does not require metal corrugated substructures. Even better, ResinDek® FR Xspan® panels are even stronger than regular ResinDek® Xspan®. This means that a portion of the cost to provide the fire rating can be offset through proper engineering of the flooring system. ResinDek® FR Xspan® is tested and capable of supporting 1,350 kg/m<sup>2</sup> uniform loads at 800 mm center supports and 1,350 kg. pallet truck loads (refer to product page for load span tables). Structural supports must be reviewed and approved by CSWP, and must be capable of supporting floor loads at specific intervals. For further details, call CSWP and/or your local building code official. ResinDek® FR Xspan® meets class “O” and European Standard EN-13501-1 for fire codes.

## ResinDek® HD

ResinDek HD is a heavy duty mezzanine flooring panel designed to support live and dead pallet truck loads up to 2,050 kgs. When combined with steel corrugated decking underneath, ResinDek HD can carry these extreme loads with purlins at up to 1200 mm on center. Great products, strong warranties, and unparalleled product support all contribute to ResinDek's leadership position in elevated platform flooring products.
