**Cornerstone Specialty Wood Products Introduces New Installation Method
for ResinDek® Mezzanine Flooring Panels**

Cincinnati, OH – January 2010 – As an industry leader in industrial and commercial mezzanine flooring for warehouses, Cornerstone Specialty Wood Products, LLC is committed to high performance floors.

“Proper installation is a big part of a solid mezzanine flooring, and so are budgets today. That is why we have introduced a new collated screw system for our ResinDek mezzanine flooring,” said Greg Doppler, President of Cornerstone Specialty Wood Products. “If we can make an installation go easier and cost less while keeping ResinDek floors performing and looking good, then we are focused upon our customers’ needs,” continued Greg Doppler.

The new installation method includes industrial collated floor color matched screws specifically designed for ResinDek, and a stand-up screw gun with consistent screw depth control settings. This new installation method is projected to save up to 40% in installation costs when used with ResinDek mezzanine flooring panels.

About Cornerstone Specialty Wood Products, LLC

Cornerstone Specialty Wood Products, LLC has ResinDek flooring in warehouses, distribution centers, manufacturing, and storage buildings worldwide. ResinDek is offered in several grades for various weight bearing load requirements, with numerous coatings offered for ESD (electro-static) and stain resistance.
