

ResinDek[®] HD Product Description

ResinDek[®] HD is a heavy duty mezzanine flooring panel designed to support live and dead pallet jack loads up to 4,500 lbs.

Leading the industry in mezzanine floor design, Cornerstone Specialty Wood Products exclusively offers ResinDek[®] HD, a mezzanine floor panel capable of supporting such extreme pallet jack loads. In today's ever demanding world ResinDek[®] and its exclusive ten-year warranty is the right choice for all of your mezzanine flooring needs.

All ResinDek[®] panels are made with specially sorted and processed wood fibers, customized formaldehyde free resins, and a wax emulsifier. The ingredients are combined and compressed under extremely high pressure and temperature, resulting in a panel with superior physical properties that are especially designed and built to withstand heavy rolling cart and pallet jack loads.

ResinDek HD Specifications

Mezzanine Floor Panels shall be ResinDek[®] HD as manufactured by Cornerstone Specialty Wood Products, LLC (CSWP).

ResinDek[®] HD shall be .75" in thickness and capable of supporting live and dead loads up to 4,500 lbs. ResinDek[®] HD shall have a Gray Diamond Seal 2TM finish or optional ResinDek[®] finish as provided by CSWP.
