

ResinDek® LD

ResinDek® LD Product Description

ResinDek® LD is a lighter duty mezzanine floor panel offering the durability, showcase appearance, and maintainability of the ResinDek® line. ResinDek® LD is the ideal warehouse mezzanine flooring solution for supporting live and dead pallet jack loads up to 2,000 lbs.

With *no delamination* and a ten-year warranty, ResinDek® LD unfinished is an economical and durable alternative to O.S.B. and plywood.

All ResinDek® panels are made with specially sorted and processed wood fibers, customized formaldehyde free resins, and a wax emulsifier. The ingredients are combined and compressed under extremely high pressure and temperature, resulting in a panel with superior physical properties that are especially designed and built to withstand heavy rolling cart and pallet jack loads.

ResinDek LD Specifications

Mezzanine Floor Panels shall be ResinDek® LD as manufactured by Cornerstone Specialty Wood Products, LLC (CSWP).

ResinDek® LD shall be .75" in thickness and capable of supporting live and dead loads up to 2,000 lbs. ResinDek® LD shall have a Gray Diamond Seal 2™ or optional ResinDek® finish as provided by CSWP.

A ten-year warranty shall be provided and passed to the end user from the manufacturer. Installation of ResinDek® panels shall be in accordance with the ResinDek® Installation Instructions provided by CSWP.
